Walk Up Book Copier
300 dpi
A3

Walk Up Scanning Made Easy

The **SMART SHOT** was designed to scan books, documents and objects in order to save the information to a USB device.

The **SMART SHOT** is a self-service walk up scanner which makes it a perfect choice for public places such as libraries, universities, airports, hotel lobbies etc. Its simple and robust design makes it almost maintenance free which results in a very low cost of ownership.

With its integrated computer the **SMART SHOT** is an independent solution that does not require any further hardware. It works pretty much like standard PC - unpack it, plug and play!

A built-in touch screen allows you full functionality of the **SMART SHOT** at your fingertips. Keyboard and mouse are no longer required.

Before the scan application is being entered the user can choose his preferred language via the touch screen monitor. More languages are constantly being added.

For the convenience of the user and in order to keep the file size as small as possible the **SMART SHOT** crops your images automatically. Of course the cropping function can also be deactivated.

For easy handling of the original the **SMART SHOT** offers a live preview of the scanning area. The user can monitor the preview window while placing the document on the scanning table.

Scanning books is not a problem. As an option there are two different book cradles available. The smaller, self-levelling book cradle has a range of 5 cm and works without glass plate. Simply place the book, flatten it with your hands and the book pages are evenly levelled. For thicker books a fully adjustable book cradle with opening glass plate is available.

For quality inspection it is possible to zoom into the images before saving. Simply select the image and touch the zoom icon.

Once you have finished the job touch the USB icon, insert your USB stick and the data will be transferred automatically. The **SMART SHOT** will confirm the process and delete the images from the internal memory immediately after the USB device is removed.

Technical Specifications

Scanning Range

DINA A3 (420 x 297 mm)

Maximum Resolution

300 dpi (full format)
Higher resolution for smaller formats possible due to zoom function

Scan Speed

1 second

Internal Data Transfer Speed

2 second

Included Software

SMART SHOT scan application

Book Cradle

Self-leveling book cradle for originals up to 5 cm thickness included

Dimensions & Weight

W: 50 cm

D: 60 cm

H: 90 cm

47 kg
